PROJECT EXPERIENCE : SUDAN

Project Experience: Illuminating Sudan through Solar Innovation

Location
SUDAN

Client
UNHCR

Project Quantity
3,560pcs Smartleaf

Products Used
SLD12-30W, Solar Panel:125W Battery:120Ah Lithium battery, Controller:10A, light on+time intelligent control, Cables: complete set for the Wiring

As a famous solar LED street light designer and manufacturer in China, SunMaster defeated the peers and won the UNHCR public lighting project in 2018. There we installed the excellent solar street lights and following pictures are shared to you.

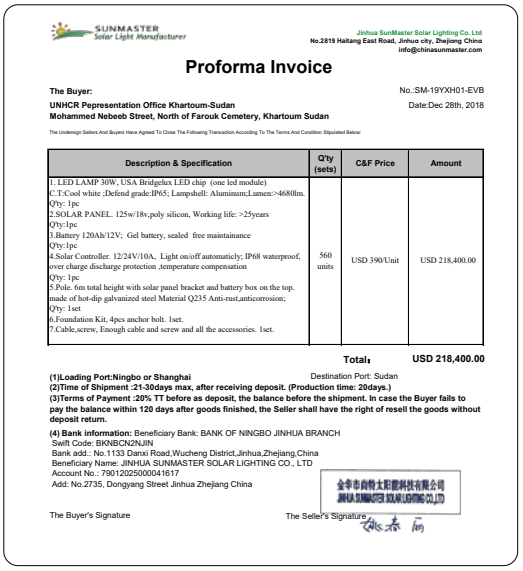

Tel:+86 139 6796 1680 Emal:info@chinasunmaster.com www.chinasunmaster.com

SunMaster provides a more cost-effective solution by supplying quality components that will last, reducing installation costs and also requiring less maintenance over 3 to 5 years. Standard full 3-year product warranty with option to extend to 5 years. Most of our designs are up to70% local content. We can also build cheaper custom designs based on a client’ s budget, needs and performance requirements.

SunMaster provided a turnkey solar lighting system - which includes a 30W LED fixture that produces 4800 lumens -with the optimal configuration of 125 W solar panel 120 AH battery. The mounting height is 6 meters. The system will provide lighting equivalent to a regular 100W HPS grid-tied fixture.

Working closely with our partners in Sudan, SunMaster Solar lighting Co., ltd has successfully delivered reliable and affordable solar street light. Totally 120 units are currently being installed in Sudan for this UNHCR project.

Officials are very happy with the light output and quality of the system provided, and SunMaster is currently in the process of providing hundreds of more solar lighting systems for the country!
